

Conversion smoke test

Test case 02 - a compact page for repeatable API and CLI checks.

Basic document components

Data-image loading, real font-family resolution, flex layout, borders, color, and inline text are all covered in a single page. 

Checks

Typography

Georgia body text with Arial headings.

Box model

Padding, margin, border, and rounded corners.

Image

Embedded PNG positioned inline with text.

Flow

Text remains selectable and wraps naturally.

Result

A reliable smoke test should be small enough to run on every build and broad enough to reveal broken rendering primitives.
